Subject: Transitional Surety Bond and Reclamation Contract, Lakeview Rock Products, Inc., Lakeview Quarry, M/035/020, Salt Lake County, Utah

Dear Mr. Larsen:

It has come to our attention that we have never finalized the transitional surety bond which you provided last November. In reviewing the surety bond document, we find that a couple of errors exist.

- Page one states that 39 acres is disturbed. This needs to be corrected to 93.8 acres. The transitional surety is directed to the entire site, not just the lower pit.
- You attached page six from the MR-TRC form showing the legal description of the site. The entire transitional reclamation contract needs to accompany the surety bond document, not just one page from the contract. Your legal description describes a survey marker of Section 14. The site consists of disturbance in both section 13 and 14. We have corrected this page to state "portions of Section 13 and 14, Township 1 North, Range 1 West, SLBM."

We have enclosed a partially completed TRC for your use. Please review the document for corrections, then complete the remaining areas that have been left blank; Registered Agent and Officers with titles. Please return the completed transitional contract within the next 10 days. We will then have our Division Director sign and execute the documents and return a copy to you for your files.

As you are aware, the transitional surety may have to be adjusted, either up or down when the permit review process is completed and we are ready to issue

tentative approval. The surety will then need to be finalized and a Reclamation Contract provided before final approval is issued.

Thank you for your prompt attention to finalizing this transitional surety. If you have any questions, please do not hesitate to contact me at 538-5382.

Sincerely,

A handwritten signature in black ink, appearing to read "Doug Jensen". The signature is fluid and cursive, with a large initial "D" and a stylized "J".

Doug Jensen
Senior Reclamation Engineer
